Introduction

The Mars Plan is one component of The Comprehensive Plan, and depicts the focused priorities and goals for the coming year. The plan lasts 11 gregorian months, and 12 moons, so it is almost a full year. Between Mars Sessions is about 343 days, a little under one year.

The 2nd Mars Plan is the first time we have been able to compile an actual Mars Plan, because during the 1st Mars Session we still were not organized enough to do so. Even a year later, the Unity Network is still in Pre-Launch, and does not have the resources to fully develop, but our

resources are growing. This Plan is still very preliminary, and most likely will not be complete for what we would like, but it certainly gets the general idea and scope of what we would like to accomplish between now and the next Mars Session, and how we would like future plans to evolve towards.

The purpose of Unity Planning, and creating Plans in general is to help us document and collectively create our vision of where we want to be by the end of Plan. Our Plans are a blueprint for our action, and help build clarity of the reality we are collectively creating. We do not have to follow the Plan, and the PLAN doesn't need to match what we do, or if we choose we can change the plan however we want as we go along, that is ok as well. Its simply a guide to help us to collectively follow our journey together.

Currently we are almost exclusively functioning in English, but eventually every Plan will have its own version in many languages. Anyone is welcome to edit this document, primarily to add ideas, and also you are welcome to translate it into any language and start collaborating in that language as well.

The Unity Network and all of the goals that we are setting out to accomplish require resources. In other words, what we put into seeing our world be balanced and supportive of individuals and communities, is what we get back in the way of seeing it manifest as we hope. Please support transformative organizations and consider helping the unity Network by signing up for voting support our projects with volunteer hours, or a generous donation. We take all forms of in-kind as well as any type of currency or metal. http://wc.tc/Donate

Overall Priorities

The Overall Priorities are currently just a brainstorm, but they will be prioritised through direct the Community Elections Systems.

Because we did not create the the Mars Election with enough time to get people to prioritize the options, we were not able to engage the public for the voting. Until then it will only be a guess to what the priorities will be. But for now we have listed a few of the higher priorities here:

- **Internal Unity Projects**
  - **Unity Day**
  - **Unity Flag**
  - **Community Elections**
  - **The Comprehensive Plan**
  - **People's Parallel Governance**
  - **LIFE Support**
- **Extended Network Projects**
  - **Digital Storytellers**
  - **SPARC Poetry**
  - **Catalyzers**
  - **YaySay**
  - **. . .**
- **External Projects & Coalitions**
  - **Human Union**
    - **Wordplayers**
  - **Rights**
    - **Human Rights**
      - **Black Lives Matter**
      - **Fight for $15**
      - **Civil Rights**
      - **Gay Rights**
      - **Women's Rights**
      - **. . .**
    - **Ecosystem, Animal & Plant Rights**
      - **Animal Rights**
      - **Thrivability & Sustainability**
  - **Peace**
    - **Elevationism (anti-terror)**
  - **Truth**
  - **Disclosure**
  - **Real Democracy Now - Occupy . . .**
  - **Political Election Season**
- **Internal Systems & Processes**
  - **FORMAP (Fundraising/Promotions)**

Vision/Goals

The Overall Goal would be that by this time next year, the next Mars Session, we will have a core group who can help support the ability for us to meet all of the set up goals for the Mars Session. This will allow us to complete the entire public interactivity plan, where many more people can be involved. Because we just didn't have the resources to complete everything this time around, we simply can not have the level of public interactivity that we hope for. Lucky we are beginning to have a completed system of exactly what needs to be done to increase the ability for us to both interact with the public and serve the people, and by the next Mars Session we hopefully will be Launched and ready to go bigger and better than ever before.

At the Next Mars Session, we our vision will be to have all of our FORMAP and resource development systems active and functioning to sufficient capacity to have all of basic needs met as a network. This will include our basic budgets, and well as a core volunteer team and the tech systems necessary for large community involvement and group collaboration.

Additionally our vision includes having full LIFE Support systems set up and active for all of our primary levels, especially for individuals. This also needs to include our core empowerment and education activities, as well as unicience and scientific discoveries. Within one year, we should be immersed within our natural sync systems, not only for our solar systems, but the entire

galaxy calendar systems. Our planning and engagements systems should meet the basic needs for allowing for Conscious Field Theory to be applied to individual applications across the spectrum of worldviews, cultures, and strategic systems. We will be fully engaged in working with discoverers and scientists across the world to be supporting each other to find answers to the deepest questions of consciousness and reality, as well as solving the largest problems of our society.

We will see our local and global communities, actively engaged in applying solutions to our most pressing problems, and we will have engaged in the basic foundational set up for our new integrative people's governance systems, as well as laying a new foundation for the thrivability and sustainability movements to catalyze a new expanse of action at all levels to once and for all initiate what is needed for natural balanced. Although this process will just be starting, it is essential to have a unified and clear vision to what we will accomplish as a community, and show that with new integrated economic systems, as well as applying basic principles of fractal science to our political systems, we will easily be able to greatly expand the current limited manifestations of collectively solving problems.

As long as people believe that we have inside of us the capability working together to implement clear tangible solutions of enabling each individual to have equal access to their basic life necessities and opportunities for advancement, we shouldn't have a problem in actively and continually applying the methodology and principles of unity to help all people across the world. Although we may not have implemented it yet, by the next Mars Session we should have already documented and clearly laid out our vision for equal pay systems, increased and guaranteed minimum wages and incomes, as well as clear systems of expanded efficient production and use of food and goods to allow the maximum number of people to be in a more balanced state with the planet and society.

Assets & Resources

We have many categories of Assets and resources for our Network. The Core Admin assets are quite small and that is where our primary fundraising goals focus. Our overall network has many more assets and resources though, and our goal is to be able to have our core admin systems be large enough to support our already existing projects and programs that are part of our overall Network.

The reason it is very important to go over our assets and resources is because without knowing what we already have, it is very difficult to plan based on our existing ability to spend funds an resources. We want to start from where we are, and grow.

Planning

The purpose of Unity Planning is not to force ourselves down a specific plan, but instead to have a guide and backdrop to help us down our various paths. Just cause it isn't in the Plan, doesn't mean we can't do it, and just because something is in the Plan doesn't mean we have to do it. But without a plan we have no map to guide us on our way, so it is important that we prioritize planning to help build a clear step by step path to reach our goals.

What Plans is the 2nd Mars Plan a Part of?
- The Comprehensive Plan of Course
- no temporal plans yet - because we haven't created any larger level plans
- What Plans would the 2nd Mars Plan have been a part of if we had created them?
  - Pre Jupiter Plan
  - Pre Saturn Plan

Other Plans that Overlap with the 2nd Mars Plan (not part of, or within)
- Pre-1st Ceres Plan
- 1st-2nd Primary Plan

General Brainstorm & Other Ideas

- Template Plan(s) - still best just to use the Mars Plan as the template for now
- Conscious Field Theory - connect equation to M Theory :)
- Unity Intro Q&A Sessions Plan
- Definitely prioritize the Galactic Calendar!!!
- Frequency & Pattern Technology is the Future BWL - Brain Wave Language Needs a Company that owns it.
- Need to Create Better communications systems, email lists, auto messging etc.. for Existing Groups including Pacific Half and New World Sessions.
- Update Unity Network Introduction Video

- Create and Active lots more Auto Repeat Messages
- Prioritize FORMAP for a balanced 20% each - Blasts/Everyone, Networks, Organizations, Groups, & Individuals
- Set Up Google+ and YouTube for all Sessions
    - For Now Just Use Primary Planetary Session YouTube
- Update and Add ALL Main Website Calendars in ALL Time Zones
- Update and compile ALL Methodology & UniGeine Policies
- 2nd Umbrella Fundraising Campaign.
- Under Planning & Our Fundraising Plan Add list of resources we need including $$ and products like computers etc…
- Project Ambassador
- Integrate existing Movement - Black Matters, Truth, Sustainability, other Ovmeting, Active within Community Elections our our Plans
- Create Unity Flag dynamics from Month to Month - And you can see the evolution of the Flag over time.
- Image based Unity Elections System - Audio, Image, Video,
- FORMAP Plan for clear steps and vision for all types of Online and Social Media Outreach. Keep everything step by step for Unity Network especially.
    - Worldplayers/Ben Support & Involvement - Have a clear checklist of what they can do per account. Maybe Start with Unity Theory account. Also make sure that their plan is completely interlaced with the full Unity Plan. Or just pick and choose what does interconnect. Remember there is a difference in Strategy. Interconnect RAMO as well - very important.
    - Need to Do Field Fundraising as well as amp up the Recruitment activities
        - FORMAP - Field Fundraising - All services & Products -
        - Everything B&W, except stickers and flags.
    - Focus Recruitment on individuals
    - The foundation of FORMAP is individuals
- Wellness & DIY LIFE Health Books
- Unicience
- Unituality
- Change Purpose to Challenge instead of problems
- Sustainability Network evolution with universities and cities alike. . . Thrivability
- Yaysay Sponsored Organization Policies Finalization
