As an Advisor to the Unity Network, its leaders, and associated organizations and projects, it is important that you know the foundational principles and vision of the Network and the foundational guiding documents including The Comprehensive Plan for Humanity's Evolution. This includes a variety of projects, that you will be helping to prioritize, as well as the methodology, strategies, and systems that make up the framework of our network. It is important to spend the time to learn the basic strategies that we will be working with, and ensuring that your personal strategies, values, and principles align enough to be a valuable advisor to our network. If your strategic perspective is not a good fit, that doesn't mean we don't want you to continue to advise and work within our network, but that you may be better adviser by supporting a single, or small group, of organizations or projects.

Our goal in having direct empowered advisors within the top levels of our leadership as a network to better enact the existing systems, policies, strategies, and goals by helping prioritize and plan. It is important for top level advisors to not engage in repetitive debate or arguments in regards to the existing strategies, values, and goals of the network as it is presented. If you personally do not agree with a particular strategy, value, or goal, but still want to be directly involved in top level advising, simply acknowledge your conflict of interest, state your perspective and document your suggested alternative(s) once, and withhold yourself from commenting and engaging on that particular issue unless/until it comes up within decision making as a topic of discussion, if our community as a whole is interested in updating that particular strategy, value, or goal. If at anytime the leadership of our network feels that there is a personal perspective of an advisor that reduces the value of their advice, we will require that advisor to have to speak through a proxy at advisor meetings. Anyone can listen in on meetings, or view recordings/notes. Additionally our highest level advisory group, the Unity Advisory Network, is publicly open for anyone to join, and all board level decisions will be available to directly vote on for all advisors in the network.

Because it is so important to us that we have advisors who are in alignment with our strategies, principles, values, and systems, we want to make all of the information regarding our guiding documents available to you to view and make your own decision based on your research. There is no question that you yourself may think there is a better way to do something, but the issue is weather or not you can put your own beliefs and biased perspective aside, and consider a different system of organizing for the purpose of helping and advising our network. We do not believe that we have the best or only system of organizing, we simply believe that this type of system should always be an option, and since no one else is doing it (or at least VERY FEW), we feel it is

essential that we give this option to the world. At anytime, if you think there is a better way of redoing everything, you are welcome to create your own network, and we will even help you do so. But when advising our network, our hope is that all advisors are aligned with our work as best as possible.

The information provided to you, which is all outlined and described here, is a vast incredible amount of information. There are at least 150 pages, and 100+ minutes of video, and is only the tip of the iceberg. It would take you weeks, possibly months to read and view it all, and it will take you years to understand it in the larger context of the comprehensiveness and integration of the whole vision if you choose to collaborate with us. We are not expecting you to read or view all of this information at this time, or even to understand it all. Our goal in providing you this information is to make sure you have access to everything that you would need in order for you to determine whether or not you feel that you would be a good fit as an advisor for our network. We feel the best way to do that is simply to give you as much information as possible, in as organized a fashion as possible, and then let you decide how much or little you want to dive into it. For paid advisors there has to be limited time intervals that you can be paid to review this information, and for others we highly recommend NOT to try to get through all of it, and only to skim and review the contents and view a few videos at a time. Anytime if you have questions, you are always welcome to call Jay for clarification at (831) 332-2486, skype: a0000d, or email jay@jayslife.net

Sorry for the long intro, but we want to make sure you are committed to our goal of finding the right people, and it's not up to us to make that determination, it's up to you. So please be honest, and at anytime you can let us know you would like to re-consider your decision to become a top level advisor, even if you still want to be involved in advising individual projects or aspects of our network. So let's get into the details...

First off: OUR SCHEDULE:

UnityNet Introductory Q&A Session open to Public: Every week/ every other week, we will have a short 30min-1hour session for anyone in the world to connect and ask questions about any aspect of the Unity Network. You yourself may have more questions before you get involved, so this could be good for you. Currently it looks like this may be taking place on Saturdays around 5pm CST. If you're interested in being informed about upcoming Info Q&A sessions make sure to get on the list: email: jay@jayslife.net with your email and phone number as well as your carrier. Or just fill out this form: https://docs.google.com/forms/d/1rglpK_VT2GroLKzATOih1MtV3h8hzUfv9wAovecPThs/viewform?usp=send_form

Scheduling Vote for Annual Unity Day Event: Our entire annual schedule is based on the scheduling for our annual event Unity Day. You can vote to help schedule this annual event at this link: https://docs.google.com/forms/d/1Xdj60_HHRGmvA1HaDEfTaswdRbDbEjDZXfqV6JrEh1A/viewform

Scheduling Vote for Advising and Work Session: Based on when people feel our Unity Day Event should take place, that will slightly narrow our options for our scheduling for Advising and Work Sessions. Right now we are choosing a 1-3 hour time slot either on Fridays, Saturdays, or Sundays, although this could change. *Note: All of our votes for global scheduling uses a 3 global times zones method.* https://docs.google.com/forms/d/1-EQ1TLeYtFZJYaEeClbwYYy89a4rLFMI-fccz2a0yz4/viewform?usp=send_form

Moon Clock & Natural Time Meetings: Also the Unity Network will host a series of scheduled global meetings in synchronization with the Moon Clock, specifically focused on The Comprehensive Plan (TCP) which is the focus of the Unity Network Methodology. Even if we don't succeed with any of our projects and goals, we can still produce and publish TCP, and shut down, and we have still succeeded. This would be at 100% Full Moon, or 0% new Moon, and could increase to other times like 50% half moons. These are open session, but efficient quick meetings, with the goal being the 5 minute meeting so the maximum number of people can be involved (although it is important to be on-time, if not early. At these meetings we will only focus on topics based on need, so we will inform you if advising will be a primary topic of discussion. The nice thing about Open moon sessions is that we don't have to schedule, as they are already scheduled and based on global moon time. We also do solstice, equinox, aphelion and perihelion meetings as well. <http://www.onhiatus.com/Moon.shtml> Also these will be the meeting where we will eventually expand from just english and include other languages, but for now, we will stick with English. Current Schedule (in UTC):

Personal Advisory Meetings and Support Sessions are currently every other week (twice a month), for 30 minutes to 1.5 hours, and for now the day of the week will be on a Saturday. The time of day will be decided through online voting, and can change overtime. Once we decide to LAUNCH our core projects and systems, Personal Advisory Meetings will take place weekly, most likely on a Tuesday or Wednesday. Doing Personal Advising and support may not be for everyone, and is more focused on individual leaders within the network and their roles, as well as basic life issues and necessities that arise which could limit or prevent their essential contributions to supporting and helping the community and evolution of humanity.

It is completely optional whether someone wants to just be a top level personal advisor (twice a month, up to once a week), a top level overall network organizing advisor (seasonally, or up to once a month), or a specific project advisor (irregular currently unscheduled), or do all of the above (up to three weeks out of the month). Lastly if you would just like to sign up to be a member of our Unity Advisory Network, you can advise on your own time and schedule.

Internal Advising and Organizational Planning Sessions are currently once per season/ once every three months, for 2 to 4 hours, also currently on a Saturday (not sure which week of the month yet-TBD). At these sessions we will be focusing on overall internal organization systems of the network, which includes internal prioritizing, core systems, internal finances, and much more... This is one of the most important

sessions we need advisors for. Once we decide to LAUNCH our core projects and systems, Internal Advising and Organizational Planning Sessions will take place twice a Month.

External Planning & Programing Sessions will be taking place once a season for 3 to 5 hours, also currently on a Saturday. These sessions will NOT include space specifically for advising, and advisors are not asked to come, but for advisors who specifically want to be involved in a external program of our network, if that program is on the agenda, you may want to be involved, so it is good for you to know about these sessions. At times external planning issues will spill over into internal organizing sessions, so you will still be able to advise us on our external projects even if you do not ever attend external planning sessions.

Lastly on scheduling we will say that you are welcome to sign up, and then at the last minute if you can't come, that is perfectly fine. Also you can just attend when you are available off an on, as long as your advice is of value to our network. We will stop asking you to come otherwise, and it is nothing personal, there is simply limited time and money. So now that you know the basic time commitments and expectations, lets get into the details of WHAT our vision and network is all about.
