What are the "Fruits" or Outcomes of the Unity Network?
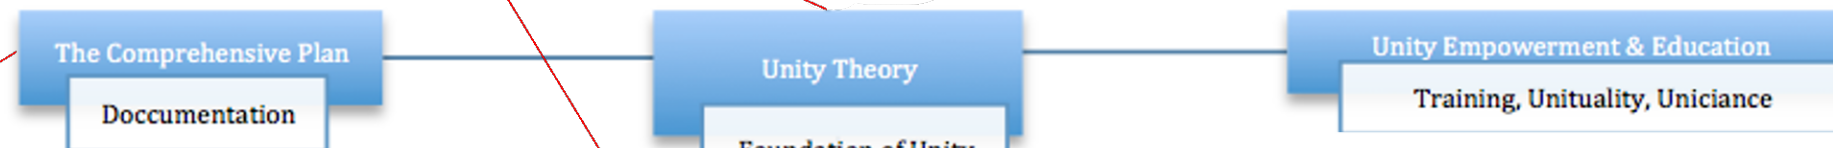

Unity Network Goal: To Implement Unity Theory by creating a variety of activities, documents and interactive methods, accessible to all people of the world, with our Unity Day annual event at the center, that can help Unite All Peoples and Social Movements for Societal Transformation.

Slogans:

Unite to Protect Rights for ALL!

It's Time to Put "Unity" back into CommUnity!

Unity Theory is the foundation to unity, and our goal is to see our theory as an equal on the table of all options to solve our global and regional crises. The general concept behind the theory is that we may not be able to solve any one of our global crises without solving all of them, or in other words, we may not be able to protect any single persons rights, with out protecting all rights, because all rights are interconnected, and all problems have common roots.

The Comprehensive Plan
Doccumentation

Unity Theory
Foundation of Unity

Unity Empowerment & Education
Training, Unituality, Uniciance

The Comprehensive Plan is the documentation of Unity Theory. Even if we are not successful in implementing Unity Theory, we still intend to create a book that documents the methodology, the step by step plan that is created through the CommUnity Elections prioritization process, and a visual story in the form of a novel which will show what the application of Unity Theory would look like if implemented, and how it would effect normal everyday people, and life on our planet.

Unity Education & Empowerment is the individual application of Unity Theory which people can directly access themselves by reading Unity Theory, our book called the Comprehensive Plan, as well as learning about the plethora of other Unity Theories that exist in the world related to science, sudo science, spirituality, religion, and learning about the diversity of social movements that exist in the world, all which affect each individuals understanding of the world that creates their "world view". Our hope is that people will realize what a world view really represents, and how important it is to come to the realization that it just may be the case the other people have VERY different world views than yourself, and that in order for us all to get along and unite, we must respect and give foundational rights each others world views in order to co-exist, and realize that it is wrong to try to impose your world view on others, even if you don't even realize your doing that. This simple realization can create a paradigm shift of conscious understanding and empowerment for individuals, local communities, and all peoples. Additionally we will be doing trainings, workshops, and share circles within our regular online sessions (or Unity Core), where anyone can share anything, if it is prioritized by the group of people who show up.

Unity Network
Unite for all Peoples Rights

Unity Day is the focal event that synchronizes all of the activities and decision making of the Unity Network. On Unity Day we promote to the world the concepts of Unity, including how we feel it is important for all peoples and social movements to unite for societal transformation. This is the day we encourage all people to take to the plazas and streets to remind those in power who really is in charge. This is when we share the image of unity with our Unity Flag, this is when we finalize our annual priority with the yearly community Election, this is when we get people to sign our post card, and send our demands to the decision makers who can directly implement changes. This is the day when the people can come together and form local conventions that make up the foundation of the glocal People's Parallel Governance Systems.

Unity Core
Regular Online Meetings / Sessions

Unity Core are our on-going meetings, sessions, and activities that people from all over the world can participate in. Currently we can work with people who speak "Globish" (Simplified and slowed down English), as well as Fluent english, and Fluent Spanish. Our hope is to fundraise to be able to have our sessions conducted in dozens of languages. Currently our primary gregorian sessions are on Saturdays, including our Unity Intro Q&A session. We also coordinate natural time sessions that correlate with the Full / New Moon, the Seasons, and the planets including Mercury, Venus, Earth, Mars, and other planets and dwarf planets that cycle must less frequently. At each open session that the Unity Network supports, any individual, or organization can propose a topic of discussion and help prioritize our goals and outcomes for the session. Projects, Organizations, or spontaneous discussions can use our open sessions as their primary form of communications, as we can have simultaneous sessions that we can connect through proxies.

Unity Post Card is our list of Demands that are prioritized out of the Community Elections, but instead of just all ideas, these are the most important actionable items that existing decision makers have the ability to change right away. We deliver our signatures to decision makers on Unity Day.

Unity Conventions
Foundation of Decision Making

Unity Conventions are the foundation to our participatory decision making structure within the People's Parallel Governance Systems. The Unity Conventions always take place on Unity Day, to finalize decisions, but can also autonomously self organize. Each regional or local jurisdiction can have a convention, and their outcomes, decisions, and proposals can directly be ratified by other conventions, as well as parallel representative bodies. This directly empowers individuals and local communities to be able to bypass representative bodies for the most fundamental and foundational decisions that are controlled by biological people themselves.

Unity Flag is the symbolic image of Unity that we have chosen to represent our vision. It is fully interactive and anyone can input any symbol to be prioritized and voted into the Unity Flag. We can also customize flags for nations, states, or local communities. By showing the most iconic symbols of social movements united on a single flag, we hope to ignite the vision of empowerment to all people that Unity brings.

Peoples Parallel GOV
Represent ONLY Biological People

Glocal General People's Parallel Assembly
Mirror UN General Assembly

US People's Parallel Congress
Mirror US Congress

CommUnity Elections are our form of direct democracy. Anyone can input any idea, and vote to prioritize all ideas and proposals that are submitted. Our system treats all ideas as equals no matter where, when, or who they come from, and continually compares each individual idea to steadily prioritize them into successive elections that culminate in the yearly CommUnity Election to choose our annual focus, which is synced with Unity Day.

People's Parallel Governance Systems are the representative branch of our decision making, which complete the democratic trilogy of direct democracy, participatory democracy, and representative democracy. There will be NO lobbyists, NO big money interests, NO corporate interests, NO national government interests, ONLY people will be represented. Our primary focal point is to create the Glocal People's Parallel General Assembly so individuals across the world can participate, and the United States People's Parallel Congress so that we can directly challenge the most bought-out legislature, which has 4 lobbyists for every 1 representative. All parallel representatives will run for office as a slate directly against the entirety of existing official congress of incumbents, with the goal of firing all of them simultaneously. Instead of individual candidates taking "bribes" from rich people, we will run a Single national campaign to get people to Vote for candidates who are NOT raising vast sums of money. The winner of the parallel congress, will be the candidate who gets the most votes with minimal, or NO, reliance on raising money for their election.
