Calling Everyone involved in the Stanford Community!!!

including Undergraduate Students, Professors, Graduate Students, Staff, Administration, Community Members, Residents, Families, Patients, visitors etc. . .

The Unity Network cordially invites you to be involved in creating and evolving. . .

The Stanford Community Governance Project

& the

Community Innovation & Social Entrepreneurship Coalition

Through community, governance, and entrepreneurial innovation we can change the world! The time is now to come together and build a new understanding of our interconnections and how we go about creating and implementing new ideas in a way that is mutually beneficial to all people. Stanford is one of the few places that doesn't have a basic democratic government that represents all residents and members. We are actively creating a governance structure that represents all people in the Stanford community equally no mater their status. But a new governance structure is NOT complete without introducing a new way to collaborate and implement all types of new and innovative ideas. We are using our methodology to support social innovative and entrepreneurial projects that strive to make our world a better place. Any individual with good ideas is welcome to get help and support each other, weather it is governance focused, socially focused, or entrepreneurial focused. The time has come for the smartest minds of our area to gather and evolve the concept of democracy and representation, innovate the fundamental systems of idea creation and community implementation, and ensure that there are NO barriers to entry. This summer we will be getting ready to launch this fall, and anyone can be involved from anywhere in the world, simply call in if you can't show up in person.
